

PRODUCT GUIDE

respiralogics™

Adding bubbles
to CPAP is proving
beneficial in treating
infants. Now you
have the perfect
complement of
products...

baby™ and
Babi.Plus®

BABI.PLUS BUBBLE PAP VALVE FEATURES

Accurate method to deliver PAP for patients weighing ≤ 10 kg

Precise pressure delivery (± 1 cm H₂O)

Maximum and minimum fluid lines

ISO 5356-1:2004(E) compliant 360° swivel inlet connector accepts 15 mm OD and 22 mm ID expiratory circuit connectors

Gas vents away from clinician

Single patient use, closed system minimizes atmospheric fluid contamination

Constructed of latex-free, hypoallergenic material

BABI.PLUS PRESSURE RELIEF MANIFOLD FEATURES

Easy to use, single-patient-use manifold

ISO 5356-1:2004(E) compliant 22 mm connector interfaces with all humidifier chambers

Capped 15 mm ID by 22 mm OD oxygen sensor port

2.0 meter gas supply tubing

Constructed of phthalate-free, latex-free and hypoallergenic material

BABI.PLUS CANNULA KIT FEATURES

Comfortable method for delivery of non-invasive therapy via nasal prongs for infants weighing ≤ 10 kg

Silicone nasal prongs to minimize skin irritation

Contoured prong allows better fit without resting on the nasal septum

Single-patient-use kits each packaged with 4 cannulas

Small Kit Sizes 0, 1, 2 and 3

Large Kit Sizes 4, 5, 6 and 7

Constructed of DEHP-free, latex-free and hypoallergenic materials

Bubble CPAP (BCPAP) is gaining broad acceptance as it provides a simple method to non-invasively manage the respiratory needs of infants. When combined with early support strategies, BCPAP has proven effective in decreasing the incidence of BPD. Practitioners wanting to use BCPAP as a first choice of therapy find the Babi.Plus system easy to use, safe and effective in performance.

Babi.Plus® Bubble PAP Valve

Accurate system for delivery of BCPAP Therapy

The Babi.Plus Bubble PAP Valve provides a convenient method of delivering continuous PAP (positive airway pressure) to pre-term, term and infants weighing less than 10 kg. The patented (US 8,424,519 B2) design delivers accuracy and stability throughout the course of therapy, freeing you to focus on patient care.

Babi.Plus was the first bubble CPAP device to receive FDA 510(k) market clearance.

Babi.Plus is adjustable from 1 to 10 cm H₂O, for gas flows from 1 to 12 liters per minute. Ergonomic design allows pressure to be easily set without the cumbersome and time-consuming tasks normally associated with bubble devices.

An integrated ISO-compliant equipment mount allows easy and secure attachment with a single or dual pole clamp.

Babi.Plus Pressure Relief Manifold

Prevents pressure build-up in the circuit

Pressure Relief Manifold is a single use device for use with pre-term, term and infants weighing ≤ 10 kg. The manifold prevents breathing circuit pressure from exceeding the preset 12.5 cm H₂O pressure limit. Each manifold is supplied with a capped oxygen sensor port and two-meter gas supply line with universal hose end connector.

The Babi.Plus Pressure Relief Manifold pairs with the Babi.Plus Bubble PAP Valve and Babi.Plus Cannula Kits companion products.

Babi.Plus nCPAP Nasal Kit

Safe, comfortable method to deliver nCPAP and NIV

The Babi.Plus nCPAP Nasal Kit is a single-patient-use device for delivery of intermittent or continuous gas flow therapy via nasal prongs to pre-term, term and infants weighing ≤ 10 kg.

The contoured nasal prongs are made of silicone to minimize skin irritation and provide stability during non-invasive therapy. The unique cannula body reduces contact or "grabbing" of the infant's skin while keeping the cannula comfortably in place. An integrated pressure monitoring line allows monitoring of proximal airway pressure without having lines or ports near the face.

Offered in eight different sizes, Babi.Plus nCPAP Nasal Kit can be used for a wide range of patients.

Baby Chin Strap™

For babies who cannot keep their mouths closed

Baby Chin Strap is a single-patient-use device intended to help keep small patients' mouths closed during delivery of nCPAP and NIV therapy. Baby Chin Strap offers support with a soft, skin-friendly strap that cups the chin and is secured to the Baby Cap with hook and loop tabs. Baby Chin Strap is adjustable to provide support to easily close the mouth and is a comfortable solution for mouth leaks.

BABY CHIN STRAP FEATURES

- Intended for very low birth weight through full-term infants
- Assists in keeping the mouth closed to optimize nCPAP and NIV therapy
- Split chin design allows for ease of application and cupping the chin
- Made of skin friendly, soft knit to optimize infant comfort
- Single patient use, latex free

Baby Cap and Circuit Bumpers™

For babies who want a soft, comfortable cap

Baby Cap and Circuit Bumpers are intended to reduce heat loss and assist in securing the nasal interface during nCPAP or NIV therapy. Baby Cap and Circuit Bumpers permit the prongs and circuit to be maintained in the best position for a relaxed fit.

Circuit Bumpers gently attach the inspiratory and expiratory limbs to the Baby Cap, cushioning the infant from the breathing circuit.

Baby Cap is a single-patient-use, soft knit cap with an opening at the crown. Each size is color coded with fringe around the crown opening. Seven sizes are available to accommodate infants weighing ≤ 10 kg.

BABY CAP AND CIRCUIT BUMPERS FEATURES

- Stretchable knit provides easy application and comfortable fit for all infants
- Circuit Bumpers attach firmly to the Cap and hold the inspiratory and expiratory limbs in place
- Allows caregivers to freely move infant without interrupting therapy
- Crown opening for checking fontanels

Baby Nose Bumper™ and RespiraGel Mustache™

For babies who want a pretty nose after therapy

Baby Nose Bumper and RespiraGel Mustache provide optimal fixation of nasal prongs for infants during nCPAP or NIV therapy. Baby Nose Bumper mustache is made of RespiraGel™, our new "skin friendly" hydrocolloid-based adhesive. Baby Nose Bumper gently holds the nasal interface to the mustache providing a secure grip and gentle cushion for the nares. Baby Nose Bumper and RespiraGel Mustache are latex-free, single-patient use items.

BABY NOSE BUMPER AND RESPIRAGEL MUSTACHE FEATURES

- Baby Nose Bumper and RespiraGel mustache provide a secure, stable fit of the prongs in the nares
- The mustache is constructed of RespiraGel, a skin-protective hydrocolloid adhesive
- Baby Nose Bumper gently grasps the soft hook on the mustache to provide a secure grip
- Baby Nose Bumper fits Babi.Plus Nasal Prongs
- Baby Nose Bumper and RespiraGel Mustache allow caregivers to move infant without interrupting therapy

Venti.Plus™ Single Pole Clamp and Dual Pole Clamp

Convenient method to attach Babi.Plus Bubble PAP Valve

The Venti.Plus Single Pole Clamp and Venti.Plus Dual Pole Clamp are sturdy pole clamps designed to support the Babi.Plus Bubble PAP Valve to an equipment pole. The Venti.Plus Single Pole Clamp is durable and intended to support weight of ≤ 3.0 kg. The unique Venti.Plus Dual Pole Clamp is intended to support a tandem weight of ≤ 10 kg of two products on an equipment pole.

VENTI.PLUS POLE CLAMP FEATURES

- Pole clamps designed to hold Babi.Plus Bubble PAP Valve
- Easily attached with thumb screw mechanism to equipment pole
- Sturdy clamp that may be used with multiple devices

Ordering Information

The Baby and Babi.Plus products can be used in neonatal critical care units, delivery rooms, pediatric critical care units and special procedure units. Respiralogsics products are available from Respiralogsics and our specialty respiratory care distributors.

Baby Product Line

30100	Baby Nose Bumper and RespiraGel Mustache (20/box)
30150	Baby Nose Bumper Replacement (25 bags of 4 each)
30301	Baby Cap and Circuit Bumpers, Size 1 (12/box)
30302	Baby Cap and Circuit Bumpers, Size 2 (12/box)
30303	Baby Cap and Circuit Bumpers, Size 3 (12/box)
30304	Baby Cap and Circuit Bumpers, Size 4 (12/box)
30305	Baby Cap and Circuit Bumpers, Size 5 (12/box)
30306	Baby Cap and Circuit Bumpers, Size 6 (6/box)
30307	Baby Cap and Circuit Bumpers, Size 7 (6/box)
30400	Baby Chin Strap (20/box)

Venti.Plus Product Line

1005	Venti.Plus Single Pole Clamp (1 each)
1006	Venti.Plus Dual Pole Clamp (1 each)

Babi.Plus Product Line

1002	Babi.Plus Kit BCPAP Kit with Bubble PAP Valve and Pressure Relief Manifold (12/case)
1010	Babi.Plus nCPAP Kit, Small (12/case)
1020	Babi.Plus nCPAP Kit, Large (12/case)
1000	Babi.Plus Bubble PAP Valve (12/case)
1030	Babi.Plus Pressure Relief Manifold (12/case)
1016	Babi.Plus nCPAP Complete Kit, Small (6/case)
1026	Babi.Plus nCPAP Complete Kit, Large (6/case)
B020	Babi.Plus nCPAP Nasal Cannula with Elbow, Size 0 (5/box)
B021	Babi.Plus nCPAP Nasal Cannula with Elbow, Size 1 (5/box)
B022	Babi.Plus nCPAP Nasal Cannula with Elbow, Size 2 (5/box)
B023	Babi.Plus nCPAP Nasal Cannula with Elbow, Size 3 (5/box)
B024	Babi.Plus nCPAP Nasal Cannula with Elbow, Size 4 (5/box)
B025	Babi.Plus nCPAP Nasal Cannula with Elbow, Size 5 (5/box)
B026	Babi.Plus nCPAP Nasal Cannula with Elbow, Size 6 (5/box)
B027	Babi.Plus nCPAP Nasal Cannula with Elbow, Size 7 (5/box)
