

ODAPT Adapter for soft mist inhalers (SMI) is the only product created specifically for use with the soft mist family of inhaled medications. Designed by a respiratory therapist to provide clinicians and patients a solution for face mask and tracheostomy application of soft mist inhalers.

ODAPT aids in the delivery of SMI medication for pediatric, adult and elderly patients where a face mask is required. It also creates a new option for delivery of SMI medication for all patients with a tracheostomy.

ODAPT Adapters are latex, BPA, and DEHP free and interface with commercially available face masks. Available as adapter only or with face mask. Don't adapt it, ODAPT it!

ODAPT ADAPTERS

Cost-effective solution to allow RESPIMAT® soft mist inhalers to be used with standard masks

Allows patient to self-administer inhaled medications via mask or tracheostomy tube

Standard fitting allows direct connection to commercially available face mask or tracheostomy tube

ODAPT WITH MASK

Easier to coordinate administration of soft mist inhalers

Ideal for patients who have difficulty creating a strong seal around SMI mouthpiece

Anatomically shaped mask with soft seal lip for optimum seal

Allows consistency for delivery of SMI medication by mask (patient preference)
