Baby Nose Bumper™ and RespiraGel Mustache™

For babies who want a pretty nose after therapy

Baby Nose Bumper and RespiraGel Mustache provide optimal fixation of nasal prongs for infants during nCPAP or NIV therapy. The mustache is made of RespiraGel™, our new "skin friendly" hydrocolloid-based adhesive. Baby Nose Bumper wraps around the body of the nasal prong and gently holds the nasal interface to the mustache, providing a secure grip and gentle cushion for the nares. Baby Nose Bumper and RespiraGel Mustache are single-patient-use items.

Baby Nose Bumper and RespiraGel Mustache may be used in conjunction with Babi.Plus® Nasal Prongs and other commercially available non-invasive interfaces in neonatal critical care units, delivery rooms, pediatric critical care units and special procedure units.

Respiralogics products are available from Respiralogics and our specialty respiratory care distributors. For our latest product information visit www.respiralogics.com or email us at 4info@respiralogics.com.

The Baby Nose Bumper comes in one piece but can be cut for placement on either side of the prong barrel to allow a better view of the septum and to stabilize the prong.

FEATURES AND BENEFITS

Baby Nose Bumper and RespiraGel mustache provide a secure, stable fit of the prongs in the nares

The mustache is constructed of RespiraGel, a latex-free, skin-protective hydrocolloid adhesive

Baby Nose Bumper gently grasps the soft hook on the mustache to provide a secure, stable grip

Baby Nose Bumper fits Babi. Plus Nasal Prongs

Baby Nose Bumper and RespiraGel Mustache allow caregivers to move infant without interrupting therapy
