Baby Cap™ and Circuit Bumpers™

For the baby who just wants a soft, comfortable cap

respiralogics™

Baby Cap is intended to reduce heat loss and assists securing nasal interface during nCPAP or NIV therapy. Baby Cap and Circuit Bumpers permit the prongs and circuit to be maintained in the best position for a relaxed fit.

Baby Cap is a single patient use, soft knit Cap with an opening at the crown. Seven sizes are available to accommodate infants weighing ≤ 10 kg. Each size is color coded with fringe around the crown opening. Single patient use item, latex free.

Baby Chin Strap may be used in conjunction with Baby Cap. The Baby Chin Strap offers support with a soft, skin-friendly strap that cups the chin and is secured to the Baby Cap with hook and loop tabs to gently close the mouth.

The Baby Cap and Circuit Bumpers work in conjunction with neonatal/pediatric ventilator circuits and oxygen therapy tubing. Designed for use in neonatal critical care units, delivery rooms, pediatric critical care units and special procedure units for stable positioning of nasal interface.
