Ories™ Cohesive Bandage

A soft wrap to secure catheters around tender skin

Ories Cohesive Bandage is a non-adhesive wrap constructed from 100% polyester made by a special weaving method. The wrap adheres to itself, not to skin, hair or clothing. Ories material allows it to conform to the body while maintaining the position of a pad or catheter. Once the site is wrapped with Ories, there is no need for another tape to secure the wrap.

Ories is suitable for fixation of primary and secondary dressings, pads, padding material, catheters and cannulas. The material is easy to tear, breathable, stretchable, water repellant and soft to the touch for tender skin. The high stretchability makes for easy wrapping. The layers of Ories do not slip so it can securely attach to itself, not to skin.

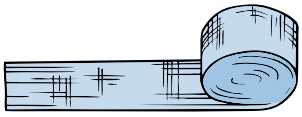

Ories is a skin-friendly, hypoallergenic, single-patient-use wrap available in two sizes: 2.5 cm width and 3.75 cm width. Each cohesive bandage is individually packaged in clear plastic.

Ordering Information

FMMJ3001	Ories 2.5 cm width by 3.5 m length	25/box
FMMJ3002	Ories 3.75 cm width by 3.5 m length	18/box
